ADNAN SYUKUR

Project Management Internship Candidate | Information Systems Undergraduate

Jakarta Selatan, DKI Jakarta, Indonesia | +62 896-0112-1014 | adnannsyukurr@gmail.com | github.com/SS7ZX

PROFESSIONAL SUMMARY

Information Systems undergraduate (5th semester) at Universitas Siber Indonesia with a vocational background in Computer & Network Engineering and hands-on experience leading teams from planning through delivery. As Chairman of Himasti, coordinates cross-functional divisions, program timelines, budgets, and stakeholders across members, faculty, and external partners. Independently delivered C-Pay, a closed-loop payment system, as a full-stack developer, and led a 5-person team to a Top 50 national finish in the BudayaGo competition. Seeking a Project Management internship to apply organizational leadership, stakeholder coordination, and technical fluency to planning and delivering real-world projects.

CORE COMPETENCIES

Project Management: Project Planning & Scheduling, Stakeholder Management, Task Delegation, Risk & Bottleneck Analysis, Budget Coordination, Requirements Gathering, Deliverable & Timeline Tracking, Agile Collaboration, Documentation & Reporting

Leadership & Communication: Team Leadership, Cross-Functional Communication, Event & Program Management, Liaison with Faculty and External Partners

Development: MERN Stack (MongoDB, Express, React, Node.js), Supabase, PostgreSQL, RESTful API Design, Database Design

Security & Auditing: VAPT (Web/Network), OWASP Top 10, Burp Suite, IDOR/Auth Bypass Mitigation, Recon Automation

Systems & Infrastructure: Cisco Packet Tracer, LAN/WAN Architecture, Routing, Switching, Subnetting, WiFi/Repeater Configuration, Linux System Administration

Design & Research: Figma (High-Fidelity Prototyping), WCAG Accessibility, User Flow Mapping

Currently Learning: Go (Golang), Firebase, Supabase Edge Functions

ORGANIZATIONAL LEADERSHIP

Chairman (Ketua), Himpunan Mahasiswa Sistem Informasi (Himasti)March 2026 – Present

Universitas Siber Indonesia

- **Team & Program Leadership:** Lead the association's core team, setting priorities and delegating responsibilities across multiple divisions to keep programs on schedule.
- **Stakeholder Coordination:** Serve as the main point of contact between members, faculty advisors, and partner organizations, aligning stakeholders on event goals, timelines, and budgets.
- **Planning & Delivery:** Plan and oversee department programs and events, tracking deliverables and resolving bottlenecks to ensure on-time execution.

KEY PROJECTS & ACHIEVEMENTS

Bhaswara – BudayaGo National Competition | Lead Developer, Team OOTDTop 50 National Finalist

- Led a 5-person team through concept, build, and submission of a gamified regional-language learning prototype.
- Coordinated task distribution and the delivery timeline across design, development, and content workstreams.

C-Pay – Closed-Loop Payment System | Solo Full-Stack DeveloperMERN Stack

- Independently planned and delivered an internal payment ecosystem for campus events, owning scope from transaction logic and database schema to the frontend interface.

LifeFin – Financial Management Web App for MSMEs (UMKM) | Full-Stack DeveloperReact, Supabase

- Built a financial management platform for MSMEs, defining feature scope with a focus on data security and usability.

VAPT Excellence Award | Security ContributorUniversitas Siber Indonesia

- Recognized for contributions to security system evaluation and vulnerability mitigation on university digital assets.

PROFESSIONAL EXPERIENCE

Network Engineer Intern, PT. Cyber Sinergi Indonesia3 Months

- Contributed to a large-scale network simulation project spanning 4 buildings using Cisco Packet Tracer.
- Helped design routing, switching, and subnetting for a high-density environment supporting numerous workstations.
- Ran bottleneck analysis on simulations to verify stability and throughput against project requirements.

IT Support Intern, Ministry of Religious Affairs (Kemenag Jakarta Selatan)3 Months

- Installed and configured network repeaters and WiFi access points to achieve full office-wide connectivity.

- Assembled PCs, ran hardware diagnostics, and reinstalled operating systems and software for staff workstations.

EDUCATION

Universitas Siber IndonesiaPresent
Undergraduate, Information Systems – 5th Semester

Vocational High School (SMK)
Computer & Network Engineering (TKJ)

- Ranked 1st (Top Graduate) in the National Final Examination.
- Ranked 1st with the highest score in the BNSP National Competency Certification (TKJ).

CERTIFICATIONS & AWARDS

- BNSP Certified – Computer & Network Engineering (Rank 1, Highest Score)
- Certified Database Developer – DB Academy
- VAPT Excellence Award – Universitas Siber Indonesia

LANGUAGES

Indonesian: Native | **English:** Professional Working Proficiency
