

ADNAN SYUKUR

Information Systems and Technology Undergraduate | Aspiring Project Manager | Full-Stack & Security Background
Jakarta Selatan, DKI Jakarta, Indonesia | adnanssyukurr@gmail.com | github.com/SS7ZX | +6289601121014

PROFESSIONAL SUMMARY

Information Systems undergraduate (3rd semester) with a vocational background in network infrastructure and hands-on experience leading small technical teams from planning through delivery. As Chairman of Himasti, coordinated cross-functional teams, managed event and program timelines, and served as the main point of contact between members, faculty, and external partners. Complements this with direct project execution experience, having independently built a closed-loop payment system (C-Pay) end-to-end and led a 5-person team to a national top-50 finish (Bhaswara). Seeking a Project Management internship to apply organizational leadership and technical fluency to planning, coordinating, and delivering real-world projects.

CORE COMPETENCIES

Project Planning and Scheduling, Stakeholder Coordination, Team Leadership, Cross-Functional Communication, Task Delegation, Risk and Bottleneck Analysis, Budget Coordination, Requirements Gathering, Full-Stack Development (MERN), Database Design, RESTful API Design, Security and Vulnerability Assessment (VAPT), Network Infrastructure Planning, Agile Collaboration, Documentation and Reporting.

ORGANIZATIONAL LEADERSHIP

Chairman (Ketua) | Himpunan Mahasiswa Sistem Informasi (Himasti), Universitas Siber Indonesia / *March 2026 - Present*

- **Team & Program Leadership:** Led the student association's core team, setting priorities and delegating responsibilities across multiple divisions to keep programs on schedule.
- **Cross-Functional Coordination:** Acted as liaison between members, faculty advisors, and partner organizations, aligning stakeholders on event goals, timelines, and budgets.
- **Event & Project Planning:** Planned and oversaw execution of department programs and events, tracking deliverables and resolving bottlenecks to ensure on-time delivery.

KEY PROJECTS & ACHIEVEMENTS

C-Pay (Closed-Loop Payment System) | Solo Full-Stack Developer (MERN)

- Independently planned and delivered a complete internal payment ecosystem for campus events, owning scope from transaction logic and database schema to the frontend interface.

Bhaswara (BudayaGo Competition) | Lead Developer, Team OOTD

- Led a 5-person development team through concept, build, and submission of a gamified regional-language learning prototype for the BudayaGo national competition.
- Coordinated task distribution and delivery timeline across design, development, and content workstreams, resulting in a Top 50 National Finalist ranking.

VAPT Award | Security Contributor

- Recognized by Universitas Siber Indonesia for contributions to security system evaluation and vulnerability mitigation on university digital assets.

LifeFin (UMKM Web App) | Full-Stack Developer

- Built a financial management platform for MSMEs using React and Supabase, coordinating feature scope with a focus on data security and usability.

PROFESSIONAL EXPERIENCE

Network Engineer Intern | PT. Cyber Sinergi Indonesia / *3 Months*

- **Project Scope:** Contributed to a large-scale network simulation project spanning 4 buildings, using Cisco Packet Tracer.
- **Planning & Design:** Helped design routing, switching, and subnetting for a high-density environment supporting numerous workstations.
- **Quality Assurance:** Ran bottleneck analysis on simulations to check stability and throughput against project requirements.

IT Support Intern | Ministry of Religious Affairs (Kemenag Jak-Sel) / 3 Months

- **Infrastructure Rollout:** Installed and configured network repeaters and WiFi access points to achieve full office-wide connectivity.
- **Hardware Operations:** Handled PC assembly and hardware diagnostics for department workstations.
- **System Support:** Performed OS reinstallation and software configuration for personnel workstations.

TECHNICAL SKILLS

Core Development: MERN Stack (MongoDB, Express, React, Node.js), Supabase, PostgreSQL, RESTful API Design

Security & Auditing: VAPT (Web/Network), OWASP Top 10, Recon Automation, IDOR/Auth Bypass Mitigation, Burp Suite

Systems & Infrastructure: Cisco Packet Tracer, LAN/WAN Architecture, WiFi/Repeater Configuration, Linux System Admin

Design & Research: High-Fidelity Prototyping (Figma), WCAG Accessibility, User Flow Mapping

Currently Exploring: Go (Golang), Firebase, Supabase Edge Functions

EDUCATION & CERTIFICATIONS

Information Systems Technology | Undergraduate - 5rd Semester

Computer & Network Engineering (TKJ) | Vocational High School (SMK)

- National Final Examination: Ranked 1st (Top Graduate)
- BNSP National Competency Certification (TKJ): Highest Score, Rank 1
- Certified Database Developer - DB Academy
- BNSP Certified - Computer & Network Engineering
- VAPT Excellence Award - Universitas Siber Indonesia
